A large grid of 100 numbered squares for page 3. The grid is organized into 10 rows and 10 columns. Each square contains a number from 1 to 100. The numbers are arranged in a specific pattern: the first row has squares 1 through 10; the second row has squares 11 through 20; the third row has squares 21 through 30; the fourth row has squares 31 through 40; the fifth row has squares 41 through 50; the sixth row has squares 51 through 60; the seventh row has squares 61 through 70; the eighth row has squares 71 through 80; the ninth row has squares 81 through 90; and the tenth row has squares 91 through 100. There are four black squares at the corners of the grid.

A large grid of 100 numbered squares for page 4. The grid is organized into 10 rows and 10 columns, identical in structure to the one on page 3. Each square contains a number from 1 to 100. The numbers are arranged in a specific pattern: the first row has squares 1 through 10; the second row has squares 11 through 20; the third row has squares 21 through 30; the fourth row has squares 31 through 40; the fifth row has squares 41 through 50; the sixth row has squares 51 through 60; the seventh row has squares 61 through 70; the eighth row has squares 71 through 80; the ninth row has squares 81 through 90; and the tenth row has squares 91 through 100. There are four black squares at the corners of the grid.

 Version 2.0

The image shows a large grid of small squares. The grid is organized into 10 horizontal rows and 300 vertical columns. Each square is a uniform size and is defined by thin black lines. In the center of the grid, there is a label '3000' positioned above the fifth row. At the very bottom of the grid, there is another label '3200' positioned above the last row. The rest of the grid is entirely empty, containing no text or other markings.
